

IP-65 Rated Monitors

TRU-Vu industrial monitors are available in IP-65 rated enclosures for heavy-duty washdown environments.

The 15", 17" and 19" models are available as panel mount models, as well as a complete stand-alone chassis, which do not require mounting inside of a cabinet or console. (other sizes available upon request)

Two glass substrates are currently available: uncoated and anti-reflective coating. We can also provide these as touchscreen models.
