

Medical/Surgical Monitors

TRU-Vu offers both medical and surgical grade monitors. The 2MP and 3MP 20" monochrome models are ideal for radiology.

Our 17" and 19" color models conform to UL 60601 standards. They feature several possible video inputs (VGA, S-Video, analog loop-through, etc.) and produce sharp, vivid images.

Please contact us for more details. Data sheets will be available shortly.
